

Parallel Session 13**Thursday, July 5, 08:00AM-10:00AM**

Special Session 84	Theory, Numerics and Applications of Quasi-Periodic and Almost Periodic Schrodinger operators Organizer(s): Charles Fulton	Location MAG-C
8:00-8:30	Maxim Zinchenko (University of Central Florida, USA) Perturbations of Finite Gap Jacobi Matrices Beyond the Szego Class	Abstracts p. 309
8:30-9:00	Rajinder Mavi (University of California, Irvine, USA) Quasiperiodic Operators with rough potentials	Abstracts p. 308
9:00-9:30	Charles T Fulton (Florida Institute of Technology, USA) Computation of the Spectral Density Function for Periodic Potentials	Abstracts p. 308
9:30-10:00	Charles T Fulton (Florida Institute of Technology, USA) Computation of Spectral Functions for Tridiagonal Jacobi Matrices	Abstracts p. 308
