

Parallel Session 10 Wednesday, July 4, 08:00AM-10:00AM

Special Session 36	Stochastic Partial Differential Equations and their Optimal Control Organizer(s): Wilfried Grecksch	Location POI-A
8:00-8:30	Michael Roeckner (University of Bielefeld, Germany) Regularization of Ordinary and Partial Differential Equations by Noise	Abstracts p. 161
8:30-9:00	Max von Renesse (Univ. Leipzig, Germany) Ergodic Properties of Stochastic Curve Shortening Flow	Abstracts p. 163
9:00-9:30	Jose Valero (Universidad Miguel Hernandez, Spain) Random attractors for multivalued lattice dynamical systems with multiplicative noise	Abstracts p. 162
9:30-10:00	Vo V Anh (Queensland University of Technology, Australia) Diffusion in heterogeneous domains	Abstracts p. 160
