

**Parallel Session 9****Tuesday, July 3, 16:00PM-18:30PM**

| Special Session<br><b>21</b> | <b>Dynamical Systems and Spectral Theory</b><br>Organizer(s): David Damanik   | Location<br><b>REH-2</b> |
|------------------------------|---|--------------------------|
| 16:00-16:30                  | Mihai Stoiciu (Williams College, USA)<br>Spectral Applications of McMullen's Hausdorff Dimension Algorithm                      | Abstracts<br>p. 94       |
| 16:30-17:00                  | Darren C Ong (Rice University, USA)<br>Orthogonal Polynomials on the Unit Circle with Almost Periodic<br>Recursion Coefficients | Abstracts<br>p. 93       |
| 17:00-17:30                  | Zhenghe Zhang (Northwestern University, USA)<br>Positive Lyapunov Exponents for Quasiperiodic Szego cocycles                    | Abstracts<br>p. 94       |
| 17:30-18:00                  | David Damanik (Rice University, USA)<br>Subshifts and Low Regularity Potentials   | Abstracts<br>p. 92       |
